

Linked Crystal Components

Linked Crystal Components are made of loose crystals linked together, either with thread or metal. Divided into three sub-categories: Bandings, Crystal Mesh and Cupchains, they are suitable for use in a wide range of segments, from textiles to accessories.

Crystal Mesh

Crystal Mesh is a flexible metal mesh carrier with integrated loose crystals. The product is available in a wide range of colors and casings, either as a Hotfix version, which can be applied using heat, or as a No Hotfix version, which can be hand or machine sewn. Crystal Mesh has an extremely smooth and graceful look and feel making it ideal for usage in apparel, accessories, footwear and jewelry.

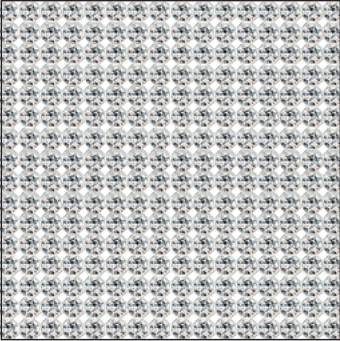

Choose from single standard colors, standard motifs, or customize designs by incorporating up to nine colors, depending on the mesh type chosen. Crystal Mesh can be ordered in sheets or in rows.

First launched in 1993, Swarovski now presents a distinctive range of six Crystal Mesh variations, providing unparalleled design flexibility to accommodate a wide array of specific creative requirements.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Mesh Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see

"Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities

- Change of size of an existing motif
- Creation of a new motif (ex. Logos, brand names, patterns...)
- Change of size of a mesh sheet / rows (minimum size: 4x4 rows; maximum size: 1x1 m depending on mesh type)
- Up to nine colors are possible per Crystal Mesh Motif
- Motifs are available for Crystal Mesh Standard and Crystal Fine Mesh only

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office.

Make sure you include all measurements for the desired motif. Please also indicate:

- Which product group your special motif applies to (Standard Mesh, Fine Mesh)
- Which casing color you wish to use (081, 082, 012)
- Whether Hotfix should be applied or not

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format.

Please contact your Swarovski sales office again if any changes are required. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a copy by email, please include a scale

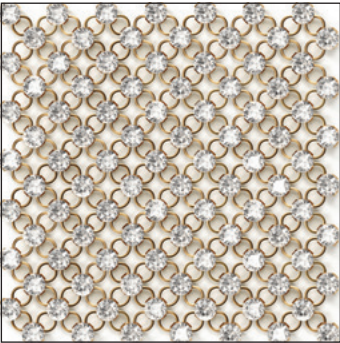

legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Multirow Cupchains Standard Collection and Inspirational Motifs. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities"

below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities

- Change of size or color of an existing motif
- Creation of a new motif (ex. Logos, brand names, patterns...)
- Up to nine colors are possible per Multirow Cupchains Motif
- Each motif can have a maximum length of 20 cm. The motif will then repeat within the Multirow Cupchains roll

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office.

Make sure you include all measurements for the desired motif, as well as the size of the desired cupchains and the numbers of rows you wish to have (2 to 10 maximum).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format.

Please contact your Swarovski sales office again if any changes are required. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a copy by email, please include a scale

legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

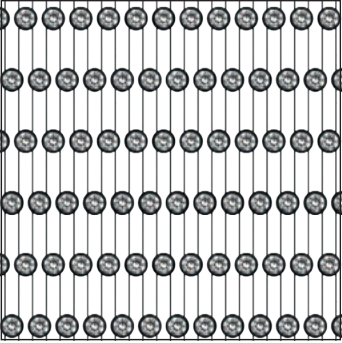

Bandings

Bandings consist of crystals set into cups that are held together by thread. They are available in different thread colors, and can be applied by sewing or gluing. Available in different casings, and colors.

* The Electric Lacquer^{PRO} effects are UV light resistant. Nonetheless, due to the presence of neon pigments in the lacquers, Swarovski recommends using the crystals only under artificial lights, as excessive sun exposure can cause the pigments to fade.
